Reminder Adopt-a-Street Program next picking up trash along Fairway September 6th, Please join us if you can.

CADDIS
May Program

The upcoming meeting should prove to be very interesting to us gadget guys, we have Tim Bull from the **"THE TOAD FLY"** to tell us about all the new and exciting equipment for 2014.

APRIL PROGRAM by:
Frank Leon, AFGC

Fishing for Panfish & White Bass

Frank did a good job of explaining where the fish were and how to catch them. He listed the lakes and streams with in the nine county area that these fish were available and most prevalent. Maybe with this knowledge some of us can now get out there and find some. One thing to remember is the regulations on number and size. A big kudos to Martin Dils for his efforts in getting us these great programs.

Monthly Meeting in April

Present: 13 members, 6 wives
Previous Minutes: Read and Approved

Found by Martin Dils in the Arkansas Democrate

University of Tulsa finds new species

Tulsa, Okla. – A Salamander first discovered by a University of Tulsa doctoral student in 20011 is being hailed as a new species in the international journal for animal taxonomy.

Doctoral student Michael Steffen and Arkansas Game and Fish Commission Herpetologist Kelly Irwin discovered the new species in May 2011 while studying genetic diversity of other salamanders in Lake Catherine State Park near Hot Springs, Ark.

The university says the latest issue of Zootaxa will feature the paper and provide details or the Ouachita Streambed Salamander. The school says the amphibian is one of the most "genetically distinct" species of salamander to be identified in the United Stated within the past 70 years.

This species currently has the smallest known range of any other amphibian in the country.

Fly Tiers' Corner
